

PhD in Economics
MA in Economics
BS in Aerospace Engineering

Markus Schneider received his PhD in economics from the New School for Social Research in 2010 for his dissertation titled *“Essays on the Statistical Mechanics of the Labor Market and the Implications for the Distribution of Earned Income”*. His research focuses on features of the income distribution and the measurement of inequality. He also has an interest in subjective probability and Bayesian approaches to econometrics.

Teaching:

“Micro- and Macroeconomics I: History & Theory” (ECON 1020), “Neoclassical Economics” (ECON 2000), “Econometrics” (ECON 3670), “Mathematics for Economists” (ECON 3850), and “Advanced Microeconomic Theory” (ECON 4030).
