Integrative option: After fulfilling concentration requirements, students may replace one or two suggested courses in the concentration with an equivalent number of courses from any other concentration

Electives: 11 units

Practicum: 4 units. All students also required to take LIS 4910 Practicum (4). SLM students take both LIS 4911 Elementary Practicum (2) and LIS 4912 Secondary Practicum (2) instead of LIS 4910. All Practicum students together—regardless of concentration—constitute one course on load.

Capstone/Thesis. In exceptional circumstances, students may petition the LIS faculty to complete a capstone project or thesis in place of the comprehensive exam. This option requires an additional 4 units beyond the requirements of the MLIS degree.
