

HEDS Faculty/Staff Survey of Campus Climate for Sexual Violence 2022 Comparison Report University of Denver

Released April 2023

This report compares the responses of University of Denver employees on the 2022 HEDS Faculty/Staff Survey of Campus Climate for Sexual Violence to the responses of employees at other institutions across the country who've taken the survey over the last 4 years.

We've organized this report by the topics that the survey addresses. The first two tabs, "Campus Climate" and "Response to Report," provide information on how your employees view their campus climate and your institution's response to incidents of sexual violence. The third tab, "Confidence," provides information on your employees' confidence in supporting and responding to those who have experienced sexual violence.

The following two tabs, "Training" and "Interactions," provide information on campus training efforts and whether employees have talked about, witnessed, or reported sexual violence.

The next two tabs, "Unwanted Sexual Behavior" and "Sexual Violence," detail employee experiences with these types of incidents.

Last, we provide demographic information on the employees who participated in this survey on the "Info about respondents" tab.

General Campus Climate Indicator

This tab includes three tables on the General Campus Climate Indicator. Table 1 includes the nine statements from the survey that were combined to create the indicator. Table 2 compares indicator results for your institution to those for all other participating institutions, broken down by gender and primary role. Table 3 provides comparative frequencies for questions related to General Campus Climate, including each of the statements used to create the indicator.

Table 1: General Campus Climate Indicator Statements	
<i>1 = Strongly disagree; 2 = Disagree; 3 = Neither agree nor disagree; 4 = Agree; 5 = Strongly agree</i>	
Below are statements about your views on the general climate at University of Denver. Please indicate the extent to which you agree or disagree with each.	
Faculty, staff, and administrators respect what students at University of Denver think.	
Faculty, staff, and administrators respect what other employees at University of Denver think.	
Faculty, staff, and administrators at University of Denver are genuinely concerned about students' welfare.	
Faculty, staff, and administrators at University of Denver are genuinely concerned about each other's welfare.	
Students at University of Denver are genuinely concerned about the welfare of other students.	
I feel valued in the environment in which I work.	
I feel close to people on this campus.	
I feel like I am a part of the University of Denver community.	
I feel safe on this campus.	

Table 2: General Campus Climate Indicator by Gender and Primary Role									
		University of Denver					All Other Institutions		
		n	Mean	Effect Size ¹	High Scores ² %	Effect Size	n	Mean	% High Scores

Views on Institutional Response to Report of Sexual Violence Indicator

This tab includes three tables on the Views on Institutional Response to Report of Sexual Violence Indicator. Table 1 includes the four statements from the survey that were combined to create the indicator. Table 2 compares indicator results for your institution to those for all other participating institutions, broken down by gender and primary role. Table 3 provides comparative frequencies for each statement in the indicator.

Table 1: Views on Institutional Response to Report of Sexual Violence Indicator Statements	
<i>1 = Strongly disagree; 2 = Disagree; 3 = Neither agree nor disagree; 4 = Agree; 5 = Strongly agree</i>	
Below are statements about your views on what might happen if someone were to report an incident of sexual violence to an official at University of Denver. Please indicate the extent to which you agree or disagree with each.	
Campus officials would take the report seriously.	
Campus officials would support and protect the person making the report.	
Campus officials would conduct a careful investigation in order to determine what happened.	
Campus officials would take appropriate action against the offender(s).

Unwanted Sexual Behavior

This tab includes three tables on questions related to experiences of unwanted sexual behavior. Table 1 shows the question that asked whether the respondent had experienced unwanted sexual behavior. Table 2 compares results from that question for your institution to those for all other participating institutions, broken down by gender and primary role. Table 3 provides comparative frequencies for all questions related to experiences of unwanted sexual behavior.

Table 1: Experiences of Unwanted Sexual Behavior	
<i>1=Never; 2=Rarely; 3=Sometimes; 4=Often; 5=Very often</i>	
Since starting work at University of Denver, how often have you experienced any of the following during any aspect of your work for this institution?	
Unwanted verbal sexual behaviors – such as someone making sexual comments about your body; making unwelcome sexual advances, propositions, or suggestions to you; or telling you sexually offensive jokes or kidding about your sex or gender-specific traits	
Unwanted nonverbal sexual behaviors – such as someone sending you sexual emails, texts, or pictures; posting sexual comments about you on blogs or social media; showing you sexually offensive pictures or objects; leering at you or making lewd gestures toward you; or touching him/herself sexually in front of you	

Table 2: Experiences of Any Type of Unwanted Sexual Behavior by Gender and Primary Role

HEDS Faculty/Staff Survey of Campus Climate for Sexual Violence 2022 Comparison Report University of Denver

Technical Information

This file summarizes data for over 8,000 employees from 19 institutions that administered the HEDS Faculty/Staff Survey of Campus Climate for Sexual Violence in the 2017–2018, 2018–2019, 2019–2020, and 2020-2021 academic year. The average response rate was 35%

	University of Denver		All Other Institutions	
	n	Response Rate ²	n	Response Rate ²
All Employee Respondents¹	480	-	8,192	35%
Employees by Gender				
Men	142	-	3,151	14%
Women	309	-	4,809	20%
Employees by Primary Role				
Faculty	165	-	3,091	13%
Staff/Administrators	305	-	4,972	21%

¹The "All Employee Respondents" group includes all employees who submitted surveys, including those who did not identify as women or men and those who selected "Other" as their primary work role (Q29).

²We calculated the response rate by dividing an institution's total number of submitted surveys by the number of invited participants. If a general link or QR code was used, no response rate was calculated.

Indicators

This file contains information on three campus climate indicators. The three indicators and their reliabilities are:

- General Campus Climate Indicator – 9 statements, Cronbach's $\alpha = 0.89$
- Views on Institutional Response to Report of Sexual Violence Indicator – 4 statements, Cronbach's $\alpha = 0.93$
- Confidence in Ability to Respond Indicator – 3 statements, Cronbach's $\alpha = 0.89$

We calculated effect sizes for key comparisons rather than using tests of statistical significance. We have so many comparisons that using a test of significance for each comparison would increase the likelihood of a Type I error should the null hypothesis be correct in any of the comparisons. Unfortunately, correcting for this would dramatically reduce the power of our comparisons, thereby increasing the chance of Type II errors if the differences are the result of more than random influences. So, we have calculated effect sizes to provide a guide for assessing the magnitude of the differences between groups. When we compared the mean of two groups, we used Cohen's d . When we compared two percentages, we used Cohen's h , which uses an arcsine transformation to derive the effect size. (See Cohen, 1988, *Statistical Power Analyses for the Behavioral Sciences*, page 180.) We only calculated Cohen's d and h when $n \geq 10$ in each cell in the comparison.

Following the practice of the National Survey of Student Engagement (http://nsse.indiana.edu/pdf/effect_size_guide.pdf), we used the following thresholds for small, medium, and large effect sizes for both Cohen's d and h :

- * Large – 0.5
- * Medium – 0.3
- * Small – 0.1

Sexual Violence

Please note, we do not report data from Question 24 ("What prevented you from reporting your experience with sexual violence?"), Question 25 ("How satisfied were you with your institution's process for making a report about sexual violence?"), and Question 26 ("How satisfied were you with your institution's response to your report?") because the number of people who responded to these questions is so small.
