Individualized Support
The Office of Career and Professional Development provides comprehensive career services to Josef Korbel MA students seeking internships, including individual coaching, programming, resources, and an online database. In managing the credit-based internship program, we work with employers and support students from the start of their search to their final reflections. As each student’s path is unique, we offer individualized support so each student can explore options relevant for their future professional success.

Apply Learning and Build a Professional Network
In today’s competitive job market, an internship is an assumed part of an applicant’s career portfolio. Completing an internship provides students with an opportunity to apply the theory and tools they’ve acquired in the classroom in a real-world setting. Employers often prefer to hire directly from a candidate pool of either former interns or students with related internship experience. The internship resources offered by our office expose students to organizations and professional experiences that are instrumental in securing full-time employment after graduation.

By the Numbers
- Korbel students registered 139 internships, including 38 international internships, spanning 25 countries
- Students interned at 109 unique organizations
- The Josef Korbel School awarded $81,080 to eligible students to offset the costs of internship experiences
  - $22,580 supported domestic internships outside the Denver area
  - $58,500 supported international internships
