

We are proud to announce

Prof. Donald R. Huffman
University of Arizona
Regents Professor Emeritus

Will give a seminar entitled:

Chemistry, Physics, and Astronomy
in the Discoveries of C₆₀

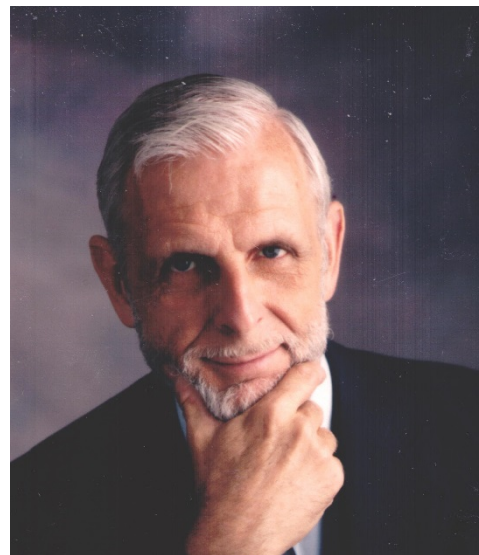

Thurs., Sept. 24 at 4 pm
Olin 205

Brief reception in Olin rotunda immediately following
All students and community members welcome.

Since the beginning of history, humankind had only ever held two pure forms of carbon in their hands (graphite and diamond). Prof. Huffman is jointly responsible for discovering a method to produce the third: C₆₀ or buckminsterfullerene. Come hear the historical perspective of the discoveries motivated by the intersection of three fields of science! The talk is open to all and will be given at a general audience level.

Jointly sponsored by:

Department of Chemistry & Biochemistry and
Department of Physics & Astronomy.
