Are you looking to enhance your resume and fund of knowledge prior to application to professional programs such as medicine, nursing, or dentistry? Are you looking for other careers within the healthcare industry such as practice management, hospital administration, health law, healthcare IT, or healthcare public policy? The University of Denver’s University College offers both a master’s degree (12 courses) and an academic graduate certificate (6 courses) in Healthcare Leadership.

The program offers students a challenging program of study for those wishing to pursue a multitude of careers in healthcare. As a part of a small and academically rigorous program, you will explore aspects of the healthcare system to which you may have not been previously exposed in your undergraduate studies including:

- Health Economics
- Legal Issues in Healthcare
- Policy and Regulation in Healthcare
- Administrative Issues in Healthcare
- Healthcare IT, Telehealth, Electronic Records

Learn from industry experts who work daily in the field. Study with a diverse group of adult learners who bring their own healthcare industry experiences to the classroom. Courses are offered both online and in the evenings on campus once a week, allowing you to pursue employment while continuing your education.

A master’s degree or graduate certificate from the Healthcare Leadership program builds a well-rounded healthcare education and provides an attractive credential for further graduate study, entrance into medical/dental/nursing school, or for entrance into a career in healthcare administration, business, IT or policy leadership.

Pursue a master’s degree concentration or academic graduate certificate in one of the following cutting-edge areas:

- Healthcare Policy and Regulatory Leadership
- Managing Legal Issues in Healthcare
- Medical and Healthcare Information Technologies
- Strategic Leadership in Healthcare Organizations
