

How do you know when you've successfully finished the CITI training requirement?

On the Learner's Menu screen, under the word "Status" it will say "Passed" in blue and list your training completion date. If not, it will say "not passed" in red and provide a link to re-enter the modules. You don't have to start over if you did not pass. You can simply select the modules with the lowest scores and retake the quizzes until you score 80%. On this same page, you can print your completion certificate and download your CITI training directly into IRBNet, DU's electronic submission system. Refer to the attached PowerPoint for step-by-step instructions on [Downloading CITI Training to IRBNet Userprofile](#).
